

Operation Manual

Model:	KLE500 (2026MY -)
Description:	USB Socket
Part Number:	99994-2268

Thank you for your purchase. This manual contains information for proper operation of the accessory parts and precautions. Read through this manual before operation for proper use of the accessory parts.

The following symbols indicate the information for proper installation and operation in this instruction.

 WARNING	: WARNING indicates a hazardous situation which, if not avoided, could result in death or serious injury.
NOTICE	: NOTICE is used to address practices not related to personal injury.

USB Socket Operation

- The electric power of the battery can be used through the USB socket [A].

 WARNING
● Make sure that the wires of the device connected to the USB socket do not interfere with the handle operation. Be careful not to pinch the wire.

 WARNING
● The surface of the USB socket becomes hot during operation. Do not touch the USB socket during or immediately after charging as there is a risk of burns. ● Do not apply more than 5.5 V to the USB terminal. There is a risk of USB socket failure and smoke and fire.

NOTICE
● To prevent battery discharge, do not use the USB socket for longer than necessary when the engine is not running. ● Maximum total amperage of the USB socket is 3 A. Use of a load that exceeds the maximum amperage may blow a fuse. When replacing the blown fuse with a new one, use a 10 A rated fuse.

<i>NOTICE</i>
● If using an accessory in the socket, do not operate this motorcycle in the rain or wash it. The USB terminal may corrode and you may not be able to charge it. If it gets wet, dry it thoroughly with the ignition switch turned off before using it. ● It may not be charged if it is used for charging or power supply other than mobile device terminals. ● Always put the cap on the socket when the accessory is not used.

<i>NOTICE</i>
● Use caution when connecting equipment to the USB socket. Devices may be damaged if connecting cables interfere with brackets or other parts of the vehicle. Follow the instructions provided with your equipment before unplugging USB cables.
